

# PROGRESS

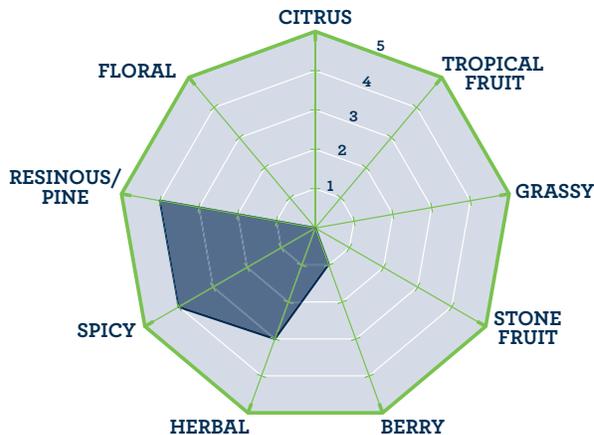

UK

**Origin:** England. Progress was one of the first varieties to come out of a modern breeding program in England. Its lineage includes Whitbread Goldings and O.B.79, making it cousin to Target. Developed to create a very “English” Fuggle-like impression in the glass.

**Usage:** Aroma. Very fine as a late kettle, hop back, or cask addition in the hoppy English trifecta: bitter, pale ale, IPA. Progress has a high enough alpha content to also perform light bittering duty in mild, brown, and Scottish ales. Adds a nice element to brown porters. Like Fuggle, does well as a single hop or component of a blend.

**Aroma & Flavor Characteristics:** Moderate to strong suggestions of spring grass, herbs, and fresh flowers overlaid on woods and dried mint. Adds nice floral and grass/herbal complement when blended with fruitier varieties (think EKG or Sovereign) for late and dry hopping.

## SENSORY HIGHLIGHTS

Fruit  
Floral  
Mint

## BREWING VALUES

Alpha Acid Range: 5.0 - 7.5%  
Beta Acid Range: 1.8 - 2.7%  
Co-Humulone as % of alpha: 25 - 27  
Total oils mL/100 gr.: 0.5 - 0.8

## OIL FRACTIONS

Myrcene: 25 - 30%  
Humulene: 40 - 47%  
Caryophyllene: 12 - 15%  
Farnesene: <1%

## AGRONOMIC DATA

Maturity: Middle  
Yield: 800 - 1,000 lbs/acre
